TECHNICAL SKILLS

Web Development: HTML, CSS, JavaScript (React), Tailwind, TypeScript

Tools: Git/GitHub, Vite, Firebase

Soft Skills: Team leadership, Project management, Flexibility, Team collaboration, Time management, Work under pressure.

Languages: English (Fluent), Arabic (Native)

EXPERIENCE

Frontend Developer | Kayan

May 2023 – Present

- Delivered responsive, user-friendly web interfaces tailored to client requirements across diverse industries using React js, Javascript, Html, Css and Tailwind.
- Managed complete project lifecycle including design collaboration, development, testing, and deployment.
- Communicated directly with clients to refine features, ensure satisfaction, and meet deadlines consistently.

Virtual Software Engineering Intern

○ Walmart USA (via Forage)

Remote | May 2025

- Simulated engineering tasks for e-commerce platforms with real-world datasets.
- Applied problem-solving to optimize logistics and delivery systems.
- Practiced Agile workflows and code collaboration using Git.

Virtual Game Development Intern

○ Electronic Arts (EA) (via Forage)

Remote | May 2025

- Completed game development lifecycle tasks including feature enhancement and bug fixing.
- Gained insight into the collaborative workflow between game designers and engineers.
- Strengthened debugging, QA testing, and teamwork skills.

Virtual Technology Consulting Intern

○ Accenture (via Forage)

Remote | May 2025

- Participated in a client-focused tech consulting simulation.
- Conducted stakeholder analysis and proposed digital transformation strategies.
- Developed client presentations and solution plans based on business needs.

EDUCATION

Lebanese International University – LIU

Bachelor in Computer Engineering

September 2023 – Present

PROJECTS

AI Therapist

- Created a virtual therapist with animated 3D avatar and voice interaction.
- Used Blender and DeepMotion for real-time lip-sync and sitting animation.
- Integrated AI for emotional understanding and natural language responses.
- Built with React and Three.js to render the avatar in a web environment.

AI Website Builder

- Developed a tool that converts user descriptions into full HTML/CSS/JS websites.
- Used Gemini API to generate custom layouts, text, and styling.
- Connected to Firebase for data storage and user session management.
- Implemented real-time previews and clean UI with React and Tailwind CSS.

AI Resume Builder

- Built a web app that generates professional resumes based on user input.
- Integrated Gemini AI api to suggest optimized content and formats.
- Enhanced user experience with clean UI using React and Tailwind CSS.
- Focused on role-specific resume generation and industry best practices.

Mobile Store Website

- Designed and developed a fully responsive e-commerce site optimized for mobile and desktop users.
- Implemented dynamic product filtering and sorting to enhance user navigation and shopping experience.
- Ensured fast load times and smooth interactions through optimized frontend code and assets.

Supplements Store Website

- Built a clean, intuitive interface with easy product browsing and streamlined checkout flow.
- Integrated client-side validation and interactive UI elements to improve usability and reduce errors.
- Applied responsive design principles to ensure accessibility across multiple devices and screen sizes.

CERTIFICATIONS

- Introduction to Frontend Development — Meta
- Responsive Web Design — freeCodeCamp
- JavaScript Algorithms and Data Structures — freeCodeCamp
- Data Visualization — freeCodeCamp
- Front End Libraries Certification — freeCodeCamp
- Walmart USA Advanced Software Engineering Virtual Experience Program
- EA (Electronic Arts) Software Engineering Virtual Experience Program
- Accenture North America Virtual Internship (Technology Consulting Track)
